

RUTURAJ BHASKAR NAWALE

Navi Mumbai, India 410206 | 9833097874 | ruturajnawale888@gmail.com | www.linkedin.com/in/ruturaj-nawale-863418288 | <https://ruturaj-nawale-portfolio.vercel.app>

PROFILE SUMMARY

AI-enabled Full-Stack Engineer with hands-on experience building production-ready ML systems and automation platforms. Strong foundation in Python, machine learning, and end-to-end web development, with real-world experience across healthcare, education, and CRM automation. Proven ability to take systems from data and models to deployed applications and business workflows.

SKILLS

- Programming & Data:** Python, SQL, R(Basic)
- Machine Learning & Analytics:** Supervised Machine Learning (Classification & Regression), Feature Engineering & Data Preprocessing, Model Training, Evaluation & Validation, Random Forest, NLP (Sentiment Analysis), Generative AI
- Full-Stack & System:** Flask, REST APIs, React Native, Tailwind CSS, SQLite, OpenCV, Model Deployment & Inference Pipelines
- Salesforce & Automation:** Salesforce Administration, Salesforce Flows, Lightning App Builder, Workflow Automation

EXPERIENCE

Salesforce Administrator (Intern):- GSBG Technologies | 2 months

- Designed and implemented Salesforce Flows to automate lead assignment and approval workflows, reducing manual intervention and improving process reliability.
- Built custom Lightning Pages using Lightning App Builder to enhance usability and data accessibility for sales teams
- Translated business requirements into scalable CRM automation solutions, improving operational efficiency and user experience

Web Developer (Intern):- ReaEspresso PropTech Pvt. Ltd | 2 months

- Contributed to the development and optimisation of production web pages in a collaborative, agile environment
- Implemented responsive UI components aligned with business and performance requirements
- Worked closely with designers and developers to deliver client-facing features within timelines

PROJECTS

Campus Project Hub: Cross-Platform Collaboration Platform

React Native, Flask, REST APIs, NLP, Serverless(Vercel)

- Built a cross-platform platform to help students discover teammates for academic projects and hackathons based on skills and interests
- Implemented smart skill-based matching to improve relevance and quality of project collaborations
- Integrated an AI-powered NLP content moderation system to automatically detect and block toxic or abusive language

AI-Assisted Rehabilitation Platform: ML + Full-Stack System

Python, MediaPipe, Random Forest, Flask, OpenCV, SQLite

- Built an AI-powered rehabilitation platform using webcam-based pose estimation and Random Forest models to classify exercise repetitions with 80–86% accuracy
- Implemented real-time corrective feedback and role-based dashboards for patients and therapists
- Designed an end-to-end system enabling automated reports, appointment tracking, and scalable home-based rehabilitation support

Proactive Student Performance Prediction & Intervention Dashboard

XGBoost, Streamlit, Python

- An AI-driven dashboard that predicts student academic performance based on comprehensive data.
- To enable **timely intervention** and **data-driven decision-making** for educators and students.
- Shifts from reactive problem-solving to proactive support.

Text-to-Image Generative AI System (Modular Architecture)

Stable Diffusion, GPT-2, Hugging Face, Streamlit, Python

- Built a modular generative AI application enabling **prompt enhancement, batch image generation, and artistic style control**
- Refactored the system from a desktop (Tkinter) application to a **scalable Streamlit web interface**
- Ensured clean separation between AI logic and UI for production-ready deployment

CardioHealth Risk Predictor Pro – ML Web Application

Stable Diffusion, GPT-2, Hugging Face, Streamlit, Python

- Developed a full-stack cardiovascular risk prediction system supporting **single and bulk inference**
- Implemented **What-If risk analysis**, interactive visualisations, and geospatial health-resource mapping
- Designed the pipeline for real-world usage with preprocessing, scaling, and model validation

Official Company Website: GSBG | Salesforce Partners

Full-Stack Web Development

- Designed and developed the **official company website (gsbg.in)** from scratch
- Handled the complete lifecycle from concept and architecture to **live deployment**

REASEARCH & PUBLICATIONS

Consumer Sentiment Insights on Smart Ring Using Supervised Classifiers

Co-authored a research paper analysing consumer sentiment using supervised machine learning models; conducted comparative evaluation of classifiers on real-world data and presented findings at the **National Conference on Robotics & AI (March 2025)**.

EDUCATION

University Of Mumbai

Bachelor's in Computer Science (CS); SGPA: 9.40

Navi-Mumbai, Maharashtra, India

June 2023- July 2026
